

I know... so...

$$18 \times 7 = \underline{\hspace{2cm}}$$

$$16 \times 7 = 112$$

$$8 \times 14 = \underline{\hspace{2cm}}$$

Is it the same?

Explain the mistakes

34×6

Method 1

$\begin{array}{r l} 30 & 4 \\ \hline 6 & 160 \end{array}$	$\begin{array}{r} 160 \\ + 24 \\ \hline 184 \end{array}$
---	--

Method 2

$\begin{array}{r l} 30 & 4 \\ \hline 6 & 180 \end{array}$
$\begin{array}{r} 180 \\ + 24 \\ \hline 210 \end{array}$

Method 3

$\begin{array}{r l} 3 & 4 \\ \hline 6 & 18 \end{array}$	$18 + 24 = 42$
---	----------------
